Subject group	Social Work and Social Welfare
Disciplinary domain	Health care 40.0 % Social sciences 60.0 %

Learning outcomes

1. describe and analyse how societal factors and social determinants affect the health and ill health of individuals and groups
2. demonstrate good knowledge and understanding of the interaction between social and psychosocial factors for health and ill health at the individual, group and societal levels
3. describe and analyse how social and psychological approaches may be relevant in both health promotion and work-life rehabilitation to help develop the psychosocial health of clients

Course content

- the importance of societal factors and social determinants of health for health and ill health among individuals and groups
- relevant social science and psychological theories
- social and psychological perspectives and approaches
- perspectives on prevention, health promotion and rehabilitation
- case studies (real and/or fictitious) relevant to social work practice

Teaching Lectures and seminars.

Prerequisites Bachelor's degree in social work or equivalent.

Examination Oral and written group examinations and individual written examination.

Grade	A, B, C, D, E, Fx, F		
Limitations	Students who do not take or who fail the regular examination are offered at least four more opportunities to take the examination. The examination may be taken on one regularly scheduled date and on two additional occasions in connection with the course. Students who have not passed after these three examinations are referred for student counselling/support and may retake the examination the next time the course is offered.		
Other regulations	The course is a compulsory course in the Master's programme in social work. Please refer to the study guide for information on the criteria for the different grades.		
Sustainable environment	A minor part of the course content deals with sustainable development.
