Learning outcomes After this course the student should be able to:

Knowledge and understanding:

- demonstrate knowledge and understanding of the purpose and the limits of sustainable corporate governance.
- evaluate the primary roles of various groups tasked with responsibilities for corporate governance (e.g. boards of directors, internal committees).
- describe and discuss different research topics and research methods within the field.

Competence and skills:

- compare and contrast regulatory systems guiding approaches to corporate governance emphasizing the advantages and disadvantages of each system from various theoretical perspectives
- compare the responsibilities of companies to different stakeholder groups and explain the role of stakeholders in corporate governance.

Judgement and approach:

- evaluate corporate governance practices and regulatory schemes from an ethical perspective.
- demonstrate the ability to critically, independently and creatively identify and formulate questions addressing corporate governance practices and to plan and use appropriate methods

to carry out advanced tasks.

- show insight into the possibilities and limitations of corporate governance research, its role in society and the human responsibility for its use.

Course content	Corporate governance is concerned with the management of interactions between dispersed investors and the reconciliation of possible conflicts of interest between various corporate stakeholders. The literature on corporate governance discusses, among other things, the role and responsibility of owners, the role and responsibility of boards, executive compensation, internal control, disclosure of governance arrangements as well as historical explanations about different corporate governance systems. Many countries also have corporate governance codes that public companies can or have to follow. During the course students are evaluating theoretical perspectives influencing regulatory practices as well as recent trends related to corporate governance.
Teaching	This course consists of lectures, seminars, practical exercises and tutoring. The course is given and examined in English.
